

Special Issue

Ecology of Invasive Aquatic Plants

Message from the Guest Editor

Invasive aquatic plants are a global problem, presenting one of the major threats to freshwater biodiversity, altering water quality, causing substantial economic harm, and impairing human use and aesthetics. This Special Issue will provide a forum to present new and synthetic research on the ecology of invasive macrophytes. Topics of interest include the factors that influence or determine spread and establishment, invasiveness, habitat suitability or invasibility, competition with native aquatic plants, and biotic and abiotic factors that limit the success of introduced aquatic macrophytes. Scales of interest can range from local to global, physiological ecology to community and ecosystem interactions, or invasions genetics and evolution of invasiveness. More information about the special issue is at:

https://www.mdpi.com/journal/diversity/special_issues/invasive_aquatic_plants Manuscript should be submitted online

at www.mdpi.com by [registering](#) and [logging in to this website](#). Once you are registered, [click here to go to the submission form](#). If you have any questions please contact the the Special Issue Editor (gladys.di@mdpi.com).

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
