Management and Control of Invasive Crayfish (Crustacea)

Message from the Guest Editor

Non-indigenous crayfish species (NICS) are on the rise due to the synergistic effects of climate change and habitat degradation. Their impacts on biodiversity, loss of ecosystem services, human health and economy have been described in recent years. A North American species is reported among the 100 worst invasive species (DASIE) and among the nine with the worst impact on more than four threatened species in Europe (GENOVESI et al. 2015). At the present time, the management of NICS has become a worldwide priority and it is mandatory to study their biology in order to find new methods for their control as well as carefully evaluating the status of endangered indigenous crayfish species (ICS). This Special Issue provides a platform to highlight new research and significant advances in NICS control and in evaluating the status of ICS.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
