

Special Issue

Legume Evolution and Diversity

Message from the Guest Editors

Leguminosae (Fabaceae), with nearly 20,000 species, is a remarkable example of flowering plants' evolutionary and ecological success. The broad geographic distribution range and diversity in morphology, life form, dispersal modes, interactions with animals, and soil bacteria of legumes is unique. This Special Issue of *Diversity* is dedicated to "Legume Evolution and Diversity" and will feature a wide range of original research and review papers on the evolution and diversity of legumes. We invite and welcome submissions to contribute to our understanding of this interesting plant group.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
