

Special Issue

Mangrove Regeneration and Restoration

Message from the Guest Editor

Mangroves provide many fundamental ecosystem services. Hence, after disturbances—both natural, such as tropical storms or tsunamis, and anthropogenic, e.g., by deforestation, oil spill or conversion to shrimp ponds—reforestation efforts are widespread, with the intention of accelerating the return to vital mangroves, which are able to provide their ecosystem services to humans again. Most of these labor-intensive initiatives, however, fail for a variety of reasons and the question arises whether natural grow back wouldn't be an easier and probably more successful way back to intact mangroves, even if a certain time lag has to be accepted. This Special Issue of *Diversity* is aimed to provide a platform to present case studies of successful and failed restoration projects and to discuss the underlying reasons. It also welcomes studies investigating natural regeneration dynamics in disturbed mangrove forest and so on.

About the Journal

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg
University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1
(Agricultural and Biological Sciences (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
