

## Special Issue

# Diversity of Wildlife Pathogens

### Message from the Guest Editors

We have created a Special Issue in the journal *Diversity* in order to integrate the multiple disciplines involved in wildlife pathogen research. Viruses, bacteria, fungi, protozoans, and helminths are important components of wildlife diversity even though they are frequently not considered as such. Knowing the diversity of these pathogens is important for better understanding their role in nature, their host range, and the level of threat they might represent to wild and domestic animals as well as humans. This collection of research articles, short communications, and literature reviews will highlight studies on the diversity, biology, diagnosis, ecology, and evolution of pathogens that infect wild vertebrates. We also welcome studies investigating vectors involved in the transmission of pathogens circulating in enzootic and zoonotic cycles. Many thanks for your interest in contributing to this Special Issue. *Keywords*

- wildlife diseases
- vector-borne diseases
- zoonotic pathogens
- infectious diseases
- animal pathogen and pathogen diagnosis
- disease outbreak and emerging diseases

---

### Guest Editors

Dr. Carolina Romeiro Fernandes Chagas

Laboratory of Parasitology, Institute of Ecology, Nature Research Centre, 08412 Vilnius, Lithuania

Dr. Francisco Ferreira

1. Center for Conservation Genomics, Smithsonian Conservation Biology Institute, Washington, DC 20013-7012, USA

2. Center for Vector Biology, Rutgers University, New Brunswick, NJ 08901-8536, USA

---

### Deadline for manuscript submissions

closed (30 June 2024)

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
