

## Special Issue

# Adaptive Evolution and Management in Small Mammals

### Message from the Guest Editors

We are pleased to announce a forthcoming Special Issue of *Diversity* focused on small mammals, which are distributed in the wild throughout almost the entire terrestrial ecosystem, even in the oceans. Small mammals are the animals with the highest morphological structure and the most perfect physiological function in the animal kingdom. Compared with other animals, mammals' most prominent feature is viviparous birth and the feeding of their young with milk from the mother. Mammals adapt to a variety of complex living environments and have highly developed brains. There are around 2000 extant species of small mammals in the world. Although small mammals have been studied in terms of life history, population dynamics, behaviour and genetics, detailed studies on their adaption, evolution and management are still lacking. More details at: [https://www.mdpi.com/journal/diversity/special\\_issues/small\\_mammals](https://www.mdpi.com/journal/diversity/special_issues/small_mammals)

### Guest Editors

Dr. Jiapeng Qu

Key Laboratory of Adaptation and Evolution of Plateau Biota, Northwest Institute of Plateau Biology, Chinese Academy of Sciences, Xining 810008, China

Dr. Wei Liu

State Key Laboratory of Integrated Pest Management, Institute of Zoology, Chinese Academy of Sciences, Beijing 100101, China

### Deadline for manuscript submissions

closed (15 December 2022)

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
