

## Special Issue

# Soil Nematodes Research

### Message from the Guest Editor

Nematodes are the most abundant metazoa on earth, and their extraordinary high species number makes them third only to insects and mollusks in the animal kingdom. This Special Issue provides a platform to highlight new research and significant advances in the understanding of soil nematode diversity and function. This comprises, e.g., standardization of methods to assess nematode community structure as well as laboratory experiments aiming for a mechanistic understanding of species functions and community composition. Moreover, environmental surveys are invited determining the influence of functional composition and functional diversity on ecosystem processes by classic morphological as well as molecular or biochemical approaches. In the context of ecosystem services and soil health, biomass and metabolic activity of species are further meaningful measures. **Keywords:**

- Soil nematodes
- Diversity
- Functional role
- Food webs
- Grazing
- Metabolic footprints
- Soil energy and carbon pathways
- Green and brown food chain
- Ecosystem services
- Soil health

## About the Journal

### Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1  
(Agricultural and Biological Sciences (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
