

Addressing Security and Privacy Concerns for Drones in Networks beyond 5G

Guest Editors:

Dr. Muhammad Asghar Khan

Prof. Dr. Pascal Lorenz

**Dr. Syed Agha Hassnain
Mohsan**

Dr. Shehzad Ashraf Chaudhry

Deadline for manuscript
submissions:
closed (31 January 2024)

Message from the Guest Editors

Networks beyond 5G (B5G) include the automation and intelligence of drones, as well as strategies for capacity expansion to address the massive connectivity problems and provide ultra-high throughput and low latency. On the other hand, security and privacy threats have always been a concern with drones. This is due to the absence of security and privacy considerations in the drone's design, including unsecured wireless channels and an inadequate computation capability to execute advanced cryptographic algorithms. This Special Issue debates the security and privacy threats that could prevent drones from being used in various B5G applications, as well as the security requirements needed. Furthermore, this Special Issue also aims to propose solutions based on lightweight security methods, including the use of blockchain technology and federated learning.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
