Special Issue

Technologies and Applications of UAV Channel Models in Communications and Spectrum Awareness: 2nd Edition

Message from the Guest Editors

We are pleased to announce this Special Issue of *Drones* on "Technologies and Applications of UAV Channel Models in Communications and Spectrum Awareness: 2nd Edition". This Special Issue highlights recent advancements in UAV channel techniques and their applications across diverse disciplines, especially communication and spectrum awareness. This Special Issue will cover, but is not limited to, the following topics:

- Channel sounding technologies and system for A2G scenarios
- UAV channel models for mmWave and sub-Terahertz bands.
- AI-driven channel modelling technologies.
- AI-driven UAV control technologies.
- UAV integrated sensing and communication (ISAC) systems.
- UAV-aided spectrum sensing and awareness.
- UAV mmWave communications technologies.
- UAV trajectory planning and optimization.
- Other applications of UAV channel model and communication.

We look forward to receiving your original research articles and reviews.

Guest Editors

Prof. Dr. Qiuming Zhu

Prof. Dr. César Briso-Rodríguez

Prof. Dr. Mou Chen

Prof. Dr. Zhenyu Na

Dr. Kai Mao

Deadline for manuscript submissions

10 December 2025

Drones

About the Journal

Message from the Editor-in-Chief

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.
There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

Editor-in-Chief

Prof. Dr. Diego González-Aguilera
Cartographic and Land Engineering Department, Higher Polytechnic School of Avila, University of Salamanca, Hornos Caleros, 50 05003 Avila, Spain

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:
indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank:
JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
