

Special Issue

Advances of UAV in Precision Agriculture

Message from the Guest Editors

This Special Issue is aimed at publishing state-of-the-art advances and the latest achievements of UAV technologies in precision agriculture. The following topics are invited to this Special Issue:

- Agricultural information integrated space-air-ground-water remote sensing and monitoring network
- Unmanned agricultural intelligent sensing and control system
- Unmanned agricultural robots guidance, navigation
- Unmanned soil moisture and crop phenotype detection, hyper-spectral sensing, and quantitative inversion
- Spray or seeding Drones for agricultural applications
- Drones for Precision Agriculture, e.g., nutrients analysis, insect infestation analysis, fungus infestation analysis, snails attack mapping, soil quality and soil compaction mapping, drainage system analysis, Harvest prediction
- Bionic flying robots, and the flying robot with soft grasping manipulator
- Drones in/for green house.

Guest Editors

Dr. Görres Grenzdörffer

Chair for Geodesy and Geoinformatics, Faculty for Agriculture and Environmental Sciences, Rostock University, Rostock, Germany

Prof. Dr. Jian Chen

College of Engineering, China Agricultural University, Beijing 100083, China

Deadline for manuscript submissions

closed (25 December 2024)

About the Journal

Message from the Editor-in-Chief

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

Editor-in-Chief

Prof. Dr. Diego González-Aguilera

Cartographic and Land Engineering Department, Higher Polytechnic School of Avila, University of Salamanca, Hornos Caleros, 50 05003 Avila, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
