

Special Issue

New Trends in Robust and Adaptive Control for Autonomous Systems

Message from the Guest Editors

Robust and adaptive control is critical to ensuring the performance and safety of autonomous systems, such as UAVs and other unmanned vehicles, especially when operating in dynamic and challenging environments. These control techniques enable autonomous systems not only to adapt to operational changes, but also to overcome external disturbances while compensating for internal system uncertainties. As autonomous vehicles become increasingly crucial in applications such as precision agriculture, logistics, and industrial automation, the development of advanced control methodologies that enhance both their autonomy and reliability is essential.

We invite authors to submit original research articles and reviews. The scope of this Special Issue includes, but is not limited to:

- robust control methods for autonomous systems
- adaptive control techniques suited to dynamic environments
- the modeling of autonomous systems and the affecting disturbances
- estimation and compensation strategies for handling uncertainties in control design
- the application of robust and adaptive control in various fields
- the integration of control algorithms within multi-agent systems and UAV networks

Guest Editors

Prof. Dr. Cuauhtemoc Acosta Lua

Department of Technological Sciences, University of Guadalajara, La Cienega University Center, Av. Universidad 1115, Ocotlan 47820, Jalisco, Mexico

Dr. Stefano Di Gennaro

Department of Information Engineering, Computer Science and Mathematics, University of L'Aquila, Via Vetoio, Loc. Coppito, 67100 L'Aquila, Italy

Deadline for manuscript submissions

closed (30 April 2025)

About the Journal

Message from the Editor-in-Chief

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

Editor-in-Chief

Prof. Dr. Diego González-Aguilera

Cartographic and Land Engineering Department, Higher Polytechnic School of Avila, University of Salamanca, Hornos Caleros, 50 05003 Avila, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
