

Special Issue

Evidence-Based Drone Innovation & Research for Healthcare

Message from the Guest Editors

The editors of this Special Issue seek papers which cover successful drone operations in hard-to-reach communities, developments in safety and aircraft technologies which are focused on meeting the requirements of medical logistics between hospitals, clinics and, where possible, directly to the point-of-care and the patient. Novel studies which are associated with maintenance of the medicine, medical product or patient sample quality and stability are welcome. Additionally, the submission of papers which evaluate how patients and communities interact with drone medical logistics services is encouraged. Research showing how drone platforms may be instrumented to allow the testing of patients at the point-of-care, within their communities, are also welcome.

About the Journal

Message from the Editor-in-Chief

Drones is an international open access journal focusing on advancing research in drone science, policy, technology, and applications. Today, drones have become indispensable for policymakers, regulatory authorities, mapping agencies, start-ups, and established firms. Their expanding societal and economic relevance is reflected in the rapid development of new sensors, upgraded platforms, specialized software, and novel applications. The journal provides a central forum for scholars in drone research and applications to exchange findings and innovations. With growing demand for high-quality research, our Editorial Board comprises international leaders and experts across relevant scientific areas. We offer rigorous peer review and rapid publication of papers from across all areas of drone science. We welcome you to submit your next paper to *Drones* and to contribute to the continued advancement of and innovations in the field of drones.

Editor-in-Chief

Prof. Dr. Diego González-Aguilera

Cartographic and Land Engineering Department, Higher Polytechnic School of Avila, University of Salamanca, Hornos Caleros, 50 05003 Avila, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
