

## Special Issue

# Drone-Based Wildlife Protection, Monitoring, and Conservation Management 2nd Edition

### Message from the Guest Editors

The second edition of this Special Issue "[Drone-Based Wildlife Protection, Monitoring, and Conservation Management](#)" focuses on the application of drones to develop methodologies to assist in the protection and management of wildlife. The use and application of drones for wildlife studies has increased significantly in the last decade. From individuals' detection to population estimations and habitat assessments, drones are now an integral part of the wildlife professional toolbox. We welcome research that examines the use of drone technology to improve our understanding of wildlife research and wildlife management.

## About the Journal

### Message from the Editor-in-Chief

*Drones* is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
