

## Special Issue

# UAS in Smart Agriculture: 2nd Edition

### Message from the Guest Editors

Continuing from the last Special Issue on “UAS in Smart Agriculture”, we are pleased to announce the Special Issue on “UAS in Smart Agriculture: 2nd Edition”. With the development of emerging information and digital technology, unmanned technology and equipment have become more important for developing sustainable agriculture. UASs are widely used in smart agriculture, including unmanned control systems, remote sensing information collection, and variable operation systems. Unmanned control systems mainly include intelligent control algorithms, communication technology, environmental awareness, and autonomous obstacle avoidance technology, which aim to improve the level of intelligent control. Unmanned systems are widely used for field crops, orchards, and unmanned ecological farms. UASs offer strong support to promoting the green, healthy, ecological, and sustainable development of smart agriculture. In this Special Issue on “UAS in Smart Agriculture: 2nd Edition”, original research articles and reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Drones* is an international open access journal focusing on advancing research in drone science, policy, technology, and applications. Today, drones have become indispensable for policymakers, regulatory authorities, mapping agencies, start-ups, and established firms. Their expanding societal and economic relevance is reflected in the rapid development of new sensors, upgraded platforms, specialized software, and novel applications. The journal provides a central forum for scholars in drone research and applications to exchange findings and innovations. With growing demand for high-quality research, our Editorial Board comprises international leaders and experts across relevant scientific areas. We offer rigorous peer review and rapid publication of papers from across all areas of drone science. We welcome you to submit your next paper to *Drones* and to contribute to the continued advancement of and innovations in the field of drones.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
