

## Special Issue

# Unmanned Aerial System in Geomatics

### Message from the Guest Editors

This Special Issue is dedicated to researchers and practitioners addressing new challenges in unmanned aerial vehicle (UAV) manufacturing, geospatial data sensing, representation, processing, visualization, analytics, development, sharing and managing, in all aspects concerning both unmanned aerial system technology and geo-informatics. With this SI we welcome original papers of either practical or theoretical nature, presenting research or applications of a specialized or interdisciplinary nature, addressing any aspect of geographic information systems and UAV technologies.

## About the Journal

### Message from the Editor-in-Chief

*Drones* is an international open access journal focusing on advancing research in drone science, policy, technology, and applications. Today, drones have become indispensable for policymakers, regulatory authorities, mapping agencies, start-ups, and established firms. Their expanding societal and economic relevance is reflected in the rapid development of new sensors, upgraded platforms, specialized software, and novel applications. The journal provides a central forum for scholars in drone research and applications to exchange findings and innovations. With growing demand for high-quality research, our Editorial Board comprises international leaders and experts across relevant scientific areas. We offer rigorous peer review and rapid publication of papers from across all areas of drone science. We welcome you to submit your next paper to *Drones* and to contribute to the continued advancement of and innovations in the field of drones.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
