

## Special Issue

# Feature Review Papers in Ecology

### Message from the Guest Editor

Review papers play a crucial role in synthesizing knowledge, identifying research gaps, and fostering new perspectives. For this Special Issue, we invite comprehensive review articles on multidisciplinary topics in ecology, aligned with the journal's scope. There is no restriction on manuscript length, as our goal is to encourage detailed overviews that provide valuable insights into your research field. We particularly welcome review articles that synthesize current knowledge, challenge existing paradigms, and propose new frameworks to advance our understanding of life and ecological systems. Manuscripts should include front matter, a literature review, and back matter.

Authors may use the provided journal template for the front and back matter, but the structure of the main content is flexible. For structured reviews and meta-analyses, please follow the same format as research articles and ensure compliance with PRISMA guidelines. We look forward to your contributions and to continuing our collaboration on this exciting project.

#### Author Benefits

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,  
and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 25.8 days after  
submission; acceptance to publication is undertaken in 8  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and  
reviewer names published annually in the journal.
