

Special Issue

Demographics and Regional Economic Development

Message from the Guest Editor

This Special Issue aims to investigate the interdependence that is present between demographic dynamics and regional (economic and social) development, as well as respond to complex questions such as the following:

In what ways does a demographic situation contribute to economic growth and the well-being of the inhabitants of a region?

What regional development strategy will support the demographic development of disadvantaged areas in particular and thus reduce regional disparities?

What links internal and external migration to demographic evolution and economic activity?

How do local societies and regional/local authorities occupy roles as active actors in demographic and/or economic development?

Are the social characteristics of a population a necessary factor for the long-term sustainability of a region's development and its healthy demographic situation?

What are the main demographic characteristics of developed countries/regions compared to less developed countries, and how do they contribute to their economic development?

Guest Editor

Dr. Kostas Rontos

Department of Sociology, University of the Aegean, 81100 Mytilene, Greece
