

Special Issue

Studies on Modeling and Forecasting Macroeconomic Indicators in the European Union

Message from the Guest Editor

This Special Issue on “Studies on Modeling and Forecasting Macroeconomic Indicators in the European Union” aims to test, compare, and quantify different macroeconomic theories as well as generate economic forecasts. The empirical evidence suggests that macroeconomic modeling is essential to economic policy in the EU as it provides a quantitative framework for macroeconomic forecasts, describes a framework for the analysis of past and future macroeconomic policy issues, and provides a relevant comparison between macroeconomic theory and empirical results.

Guest Editor

Prof. Dr. Chaido Dritsaki
