Special Issue

Dynamic Macroeconomics: Methods, Models and Analysis

Message from the Guest Editor

This Special Issue aims to collect relevant work dealing with methods, models and analysis in the field of dynamic macroeconomics. Original theoretical and/or empirical explorations of old yet controversial questions (e.g., the fiscal roots of inflation) or attempts to provide perspectives on topics at the center stage of the current debate (e.g., the macroeconomic dimension of the green transition) are all welcome. Topics of interest include, but are not limited to, the following: heterogeneity in macroeconomic analysis; DSGE modeling; AB modeling; macroeconometric techniques and applications; and numerical methods.

Guest Editor

Prof. Dr. Marco Maria Sorge
Department of Economics and Statistics, University of Salerno, Via Giovanni Paolo II, 132, 84084 Fisciano, SA, Italy
