

Special Issue

Monetary Policy and Inflation Dynamics

Message from the Guest Editor

The interplay between monetary policy and inflation dynamics has returned to the forefront of macroeconomic analysis, following the resurgence of inflationary pressures in both advanced and emerging economies. This Special Issue aims to gather original contributions that advance our understanding of how monetary policy influences inflation outcomes and how central banks respond to evolving inflationary conditions. We welcome both theoretical and empirical papers addressing a wide range of topics, including but not limited to: monetary policy transmission mechanisms; inflation targeting regimes; the role of expectations and credibility; monetary policy under uncertainty; interactions between monetary and fiscal policies; unconventional monetary policies and inflation; structural determinants of inflation; and inflation dynamics in open economies.
