

## Special Issue

# Emerging Economies and Sustainable Growth

### Message from the Guest Editor

The development of financial technologies is responsible for significant tensions on the demand on financial assets and sustainable economic growth in emerging economies. Some financial assets can become strategic and critical resources. The development of financial technologies is determined by the success achieved in studying the formation processes and properties of economic systems. This Special Issue aims at gathering recent advances in the field of sustainable development and financial innovation. These challenges related to Fintech but also environmental, societal, economic, and financial tools, as well as process management, are of interest to this Special Issue. The issue of the interrelationship between economic growth and sustainability has been the subject of thorough research and is of great interest to economists, researchers, and policymakers.
