

Special Issue

Labour Market Dynamics in European Countries

Message from the Guest Editor

Labour market analysis is a research topic that continues to remain relevant. Both the global economic crisis in 2008 and the COVID-19 health pandemic resulted in recessions and transformed labour market processes in the European Union member states. In the years since then, focus has been placed on maintaining labour market stability, in addition to addressing increasing challenges, international migration, the influx of refugees, foreign guest workers, internal labour market mobility within the EU, youth unemployment, declining and aging populations, and the rise of artificial intelligence, which collectively impact labour market processes.

Given this background, we welcome studies centred on these topics. Furthermore, topics such as green jobs and job creation as concerns sustainability, as well as non-traditional (atypical) employment solutions, are also important areas of focus. Analysing regional differences in the European Union's labour market via statistical methods can also provide interesting results for policymakers in order to achieve convergence.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Ralf Fendel
WHU—Otto Beisheim School of Management, Burgplatz 2, 56179
Vallendar, Germany

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), EconLit,
EconBiz, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Economics) / CiteScore - Q1 (Economics,
Econometrics and Finance (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22 days after
submission; acceptance to publication is undertaken in 5.7
days (median values for papers published in this journal in
the first half of 2025).
