Message from the Guest Editor

Dear Colleagues,

As a result of changing socio and political context, educational practice has changed and continues to do so at an incredible pace.

This Special Issue facilitates dialogue and debate regarding the challenges that educators are facing, the practices that are being introduced, and most importantly, the values that determine their actions. In particular, the following questions will serve as a backdrop to the submitted articles:

1. What are the recent educational reforms and changes that have been imposed on educational institutions, and how do educators at the school level respond to such directives?
2. How are educators affected by external policy initiatives?
3. Are school leaders able to nurture an environment conducive to professional learning amongst educators despite these challenges?
4. How are experiences deepening and shaping leaders to sharpen and enlarge their perspectives?
5. What is the moral purpose that drives educational leaders to handle the challenges to focus on the greater good?
