### Message from the Guest Editors

Dear Colleagues,

The future of education requires a systematic analysis and reflection from the scientific community, especially in the current context marked by the global pandemic, which continues to affect society. Based on the contributions of the respective authors participating in this Special Issue, we aim to strengthen the knowledge for guiding the future of education in the 21st century. The aim is to delimit, through research and innovation, new educational scenarios in which the digital component is integrated in a significant way.

This Special Issue focuses on new proposals, methodologies, resources, research, innovations, reviews, etc., on education and digital technology. We welcome contributions from different disciplines (Arts and Humanities, Sciences, Health Sciences, Social and Legal Sciences, Engineering and Architecture), teaching modalities (face-to-face, remote and a mix of both) and educational levels (university and non-university).
