

## Special Issue

# Machine learning in Education

### Message from the Guest Editor

Machine learning and data mining have transformed the way students, educators, and institutions interact through intelligent systems to monitor and optimize student's success. The ever-increasing amount of student data available in e-learning management systems allows one to track information about student activities, participation, and interactions in multiple courses. This allows one to resolve arising challenges in education. The ultimate goal of machine learning in education is to foster student success and increase graduation and retention rates. Nevertheless, these intelligent systems need to be fully supported by the educational institution, which is responsible for providing educators with the tools and resources necessary to intervene. The revolution of new online courses, and particularly massive open online courses (MOOCs), calls for new machine learning approaches that can resolve the new challenges of education in the 2020s.

## About the Journal

### Message from the Editor-in-Chief

From its first issue in 2011, *Education Sciences* (ISSN 2227-7102) has grown as a scholarly international open access journal. Its aim remains to publish extended full-length research papers that have the scope to substantively address current issues in education. As a member of the Committee on Publication Ethics (COPE), our goal has been to disseminate high quality research. Our publisher, MDPI, takes the responsibility to enforce a rigorous double-blind peer-review together with strict ethical policies and standards to ensure to add high quality scientific works to the field of scholarly publication.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Educational Research Abstracts, PsycInfo, and other databases.

#### Journal Rank:

JCR - Q1 (Education and Educational Research) / CiteScore  
- Q1 (Physical Therapy, Sports Therapy and Rehabilitation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.2 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
