Occupational Health Challenges: Mapping Psychosocial Factors Driving Healthy Organizations

Message from the Guest Editors

This Special Issue, titled "Occupational Health Challenges: Mapping Psychosocial Factors Driving Healthy Organizations", aims to deepen our understanding of contemporary challenges by providing a platform for the comprehension, analysis, and dissemination of research findings in the organizational field. Although it has been demonstrated that well-being within organizations leads to benefits for workers' physical and mental health, as well as for performance and productivity, many questions remain unanswered. Topics covered in this Special Issue include workplace stress, work-family balance, participation in decision-making within the organization, organizational justice, burnout, engagement, interpersonal and group relationships at work, diversity, telework and mental health, among others. We invite researchers, academics, and professionals in related fields to submit their original research, systematic reviews, and meta-analyses that offer new perspectives and solutions to the psychosocial challenges in the workplace.

Guest Editors

Prof. Dr. Samuel Fernández-Salínero

Prof. Dr. Gabriela Topa
