

Special Issue

AI and Blockchain as New Trigger in the Education Arena

Message from the Guest Editors

Artificial Intelligence (AI) and Blockchain technology application to education has brought forth a new world of possibilities for all the actors in this sector. In this context, this Special Issue aims to discuss new research and trends on all dimensions of AI and Blockchain applied to education. This Special Issue will provide a global forum for the investigation and reporting of diverse issues that affect the application of AI and Blockchain to education: innovations in the learning processes, new avenues for education managers, and new learning contexts. Original research contributions are solicited, and authors are invited to contribute with research papers, case studies, and demonstrations that present original scientific results—specifically, case studies about blockchain applications to education, empirical studies in education regarding the use of blockchain technologies, new educational management systems, new evaluation techniques and tools, and AI and blockchain learning best practices.
