Bachelor's Program of Artificial Intelligence and Information Security, College of Science and Engineering, Fu Jen Catholic University, New Taipei City 242062, Taiwan

Prof. Dr. Cheng-Chi Lee

Department of Library and Information Science, Fu Jen Catholic University, New Taipei City 24205, Taiwan

Deadline for manuscript submissions:

closed (15 December 2023)

Message from the Guest Editors

Dear Colleagues,

The increased automation in modern smart environments are changing our activities of daily life as well as various industrial processes. Recent emerging communication technologies including 5G/6G, Internet of Things (IoT), Internet of Drones (IoD), and Internet of Everything (IoE) facilitate the development of various smart places, including smart homes, smart hospitals, smart farms, smart factories and smart cities. Problems have arisen related to information security and the data privacy of communicating entities (users, servers, IoT devices, etc.) in the systems.

At present, there is a lack of sufficient research works integrating cryptography techniques and blockchain in a single design with the aim of addressing the issues described above. This Special Issue is seeking innovative cryptographic methods, tailored blockchain designs, or works integrating cryptography and blockchain in design with the aim of assuring security and privacy in systems.

an Open Access Journal by MDPI

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
