

Advanced Energy Supply and Storage Systems for Electric Vehicles

Guest Editors:

Dr. Dmitry Baimel

Electrical engineering
department, Shamoon College of
Engineering, Jabotinski St 84,
Ashdod, Israel

Dr. Inna Katz

Department of Electrical and
Electronics Engineering,
Shamoon College of Engineering,
Basel St., Be'er Sheva 8410802,
Israel

Deadline for manuscript
submissions:
closed (20 March 2024)

Message from the Guest Editors

In recent years, electric vehicles have become incredibly popular and widespread. Electric vehicles are based on evolving technology that is constantly being improved. Their key components are power sources and energy storage systems, and the features of these components directly influence the performance and driving distance of the vehicles.

The purpose of this Special Issue is to publish original theoretical and practical research ideas in the field of power supply and energy storage systems for electric vehicles. The topics include but are not limited to:

- New energy storage systems for electric vehicles;
- Battery and fuel cell storage systems for electric vehicles;
- Energy management systems for electric vehicles;
- Hybrid battery/ultra-capacitor energy storage systems;
- New topologies and control methods of inverters for electric vehicles;
- Thermal management of battery systems;
- Advanced charging systems for electric vehicles.

an Open Access Journal by MDPI

Editor-in-Chief

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
