Message from the Guest Editor

In our everyday lives, intelligent robot systems are being increasingly and more widely applied. To improve the ability of robots to learn, adapt, and operate, intelligent control which mimics human intelligence is a useful and well-known advanced technique. Intelligent control includes various artificial intelligence techniques such as fuzzy logic control, neuro-fuzzy control, expert systems, genetic control, evolutionary algorithms, reconfigurable control, and swarm algorithms.

This Special Issue, entitled “Intelligent Control and Applications for Robotics”, is focused on the latest novel advancements of intelligent control methods in robotic applications. Topics of interest include, but are not limited to:

- Intelligent control and its application;
- Intelligent robotics and related fields;
- Internet of Things;
- Multi-agent systems;
- Advanced robot control systems;
- Optimal and learning control;
- Soft computing.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
