### Message from the Guest Editors

In this Special Issue, we are interested in incorporating the latest advances in the application of artificial intelligence to the world of health. The works that will have a place in this issue will be both those focused on the health systems themselves, as well as the techniques from artificial intelligence that are applied to health, such as deep learning, generative adversarial networks, digital twins, and others related solutions. Similarly, the techniques for incorporating health data, which address aspects such as quality, safety, interoperability, techniques to incorporate missing values, etc. are welcome for submission.

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
