

Secure Integration of Artificial Intelligence (AI) and Autonomous Vehicular Networks

Guest Editors:

Prof. Dr. Zhiquan Liu

College of Cyber Security, Jinan University, Guangzhou 510632, China

Dr. Zuobin Ying

Faculty of Data Science, City University of Macau, Macau 999078, China

Dr. Jingjing Guo

School of Cyber Engineering, Xidian University, Xi'an 710071, China

Deadline for manuscript submissions:

15 August 2024

Message from the Guest Editors

Dear Colleagues,

The application of artificial intelligence (AI) technologies can provide significant benefits for automating sensing, computing, and communication tasks in autonomous vehicular networks.

This Special Issue specifically focuses on the latest advances, challenges, and approaches to the secure integration of AI and autonomous vehicular networks. We encourage original and high-quality contributions that address both the theoretical and practical aspects of the above challenges. Topics of interest include, but are not limited to:

- Deep learning and reinforcement learning for autonomous vehicular networks;
- Edge learning and distributed machine learning for autonomous vehicular networks;
- Privacy-preserving federated learning for AI-enabled autonomous vehicular networks;
- New network architecture for AI-enabled autonomous vehicular networks;
- Sensing data falsification and countermeasures for AI-enabled autonomous vehicular networks;
- Cyber physical system security for AI-enabled autonomous vehicular networks;
- Intrusion detection and incident response for AI-enabled autonomous vehicular networks;
- Data security and privacy preservation for AI-enabled autonomous vehicular networks.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
