Topics of interest to this Special Issue include, but are not limited to, the following topics:

- CPS system architecture
- Control optimization of CPS
- Machine learning for CPS
- Data mining and analytics
- Game theory applied to CPS applications
- Model-based design and verification of CPS
- Mobile and cloud computing for CPS
- Wired and wireless networking for CPS problems
- Signal processing and fusion for CPS
- Human-in-the-loop shared or supervisory control of CPS
- Practical application-oriented system design for CPS
- Security and privacy for CPS

Welcome to contribute!

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.
Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
