Deadline for manuscript  
submissions:

**30 September 2021**

### Message from the Guest Editors

Dear Colleagues,

The International Conference on Control, Automation, and Robotics (ICCAR 2021) aims to be the space for presenting the most recent and groundbreaking contributions, applications, and research work in these dynamic and challenging fields. ICCAR 2021 provides also the framework for discussing and analyzing the technological and scientific trends in robotics, automation, and artificial intelligence that are shaping the world's future.

This Special Issue presents a selection of the best papers presented at ICCAR 2021. The papers were selected according to the creativity, innovativeness, rigor, impact, and relevance of their contributions.

We hope this Special Issue will increase and strengthen the interest and the spirit for developing new scientific and technological knowledge and applications every time.

Main scopes:

- Robotics
- Automation
- Control engineering
- Artificial intelligence
- Measurement
- Signal processing
