Message from the Guest Editors

Dear Colleagues,

A successful migration of an intelligent system comprises the following: (i) scalability: the ITS should be capable of collecting ever-growing transportation data to improve the performance and maintain the relevancy of existing models; (ii) accuracy: ITS applications can only benefit the general public if they are highly accurate, which simultaneously ensures high social acceptance; and (iii) security: the data and systems must be protected from intrusions, breaches, and threats to maintain accessibility, confidentiality, and integrity.

This Special Issue will present high-quality research on scalability, accuracy, and/or security-oriented research intelligent transportation systems, with a focus on state-of-the-art theories, methodologies, and systems for the design, development, deployment, and innovative use of artificial intelligence for applications in intelligent transportation systems.

You are welcome to contribute!!!

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)
