Message from the Guest Editor

Dear Colleagues,

With the increasing adoption of utility-scale power electronic-based technologies (such as wind and photovoltaic generators and energy storage systems), the power system characteristics can change drastically. Accordingly, system behavior, measured using short-circuit ratios, rate of frequency change, frequency nadir, and unintended oscillations, and its associated changes and impact on system operators will evolve.

This Special Issue aims to collate articles covering a range of phenomena, operational impacts and counter measures to ensure system stability of inverter-based resources (IBR), emphasizing on the modeling techniques, analysis methods, phenomena characterization, and solutions.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
