Message from the Guest Editors

This Special Issue will provide an opportunity for researchers to exchange new ideas across the emerging field. The goal of this special issue is to collect high-quality contributions to address the RFID advancements as the conduit for technology improvement. Topics of interest include but are not limited to the ones listed below.

- RFID applications in healthcare, precision agriculture, transportation, safety, security, inventory management, logistics, fashion, retail
- Adversarial modeling for RFID and IIoT
- Vulnerability Assessment and testing for RFID and IIoT
- Intrusion detection and prevention schemes for RFID and IIoT
- RFID for Industry 4.0
- RFID for Smart Cities
- RFID-enabled localization systems
- RFID sensors
- RF tomography and environmental sensing
- Low-cost side-channel countermeasures for RFID and IIoT
