Message from the Guest Editors

The demand for AI technologies increased over the last decade. AI continues to emerge with new technologies. It is increasingly evolving into an Artificial General Intelligence (AGI) technology and has been applied to several domains. Smart City continues to develop in many areas as AI technology is applied. Research on applications as well as AI and smart city technologies is needed.

This Special Issue is focused on Artificial Intelligence and Smart City. It will include novel research results about technologies such as deep learning, anticipation, sensors, AGI, smart city applications etc. Attention will also be paid to their various industry applications.

The topics of interest include, but are not limited to, the following:

- AI technologies (agents, modeling etc.);
- Deep learning technologies;
- Anticipation;
- Expectations;
- AI applications;
- AGI (Artificial General Intelligence);
- Explainable AI
- Smart City (theory, model, platform etc.);
- Smart City technologies inside;
- Energy, traffic and many applications in Smart City;
- Smart City applications;
- AI industrial applications;
- Intelligent monitoring system;
