

## New Advances of Vehicular Ad Hoc Networks (VANETs)

Guest Editors:

### Dr. Safdar H. Bouk

Virginia Modeling Analysis and Simulation Center (VMASC), Old Dominion University, Norfolk, VA, USA

### Dr. Chaker Abdelaziz Kerrache

Department of Mathematics and Computer Science, University of Ghardaia, Ghardaia, Algeria

### Dr. Murad Khan

Department of Computer Science & IT, Sarhad University of Science and Information Technology, Peshawar, Pakistan

Deadline for manuscript submissions:  
**closed (15 March 2020)**

### Message from the Guest Editors

There are different communication technologies that cohere all the VANET elements to form a single intelligent system. Examples of those technologies include, but are not limited to, LTE-A, DSRC/WAVE, WiFi, and high data-rate 5G and beyond communication services. These technologies are used to communicate content within the network through vehicle-to-vehicle (V2V), vehicle-to-infrastructure (V2I), vehicle-to-pedestrian (V2P), and/or vehicle-to-everything (V2X) communication paradigms. Therefore, in this Special Issue, we seek contributions on the topics including, but not limited to the following topics:

- Efficient and reliable communication in VANETs
- Security and privacy protection in VANETs
- Scalable data distribution in VANETs
- Emerging VANET applications and prototypes.
- Crowdsensing technologies and techniques for VANETs

Please click [here](#) for more detailed information of this special issue.

**Welcome to submit your excellent works!**

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Flavio Canavero

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
