

New Trends and Future Challenges in Computational Microwave Imaging

Guest Editors:

Prof. Dr. Maokun Li

Dr. Marco Salucci

Dr. Alessandro Polo

Message from the Guest Editors

This Special Issue is aimed at highlighting the challenges, current trends, and most recent advances in computational microwave imaging as applied to several non-invasive *EM* problems.

Keywords:

- Computational microwave imaging
- Inverse scattering
- Biomedical imaging
- Subsurface imaging
- Through-the-wall imaging
- Non-destructive testing/evaluation
- Structural health monitoring

Deadline for manuscript
submissions:
closed (31 March 2021)

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), [Ei Compendex](#) and [other databases](#).

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)
