### Message from the Guest Editors

Recently, many important technologies have emerged or reached a new stage of development, such as cloud computing, machine learning, blockchain, the Internet of Things, big data, and mobile computing. This new computing landscape opens a wider possibility to access social media, e-business, e-learning, e-finance, crowdsourcing, and many other online services. We are excited to see that the scale and popularity have reached a level that our human society has never experienced before. This Special Issue aims to gather original, state-of-the-art research and development contributions on all types of cooperative working applications, but particularly in cooperative design, cooperative visualization, and engineering. This Special Issue will predominantly comprise selected papers of the 19th International Conference on Cooperative Design, Visualization and Engineering (CDVE2022).

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), [Ei Compendex](#) and [other databases](#).

**Journal Rank:** JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
