31 August 2019

Message from the Guest Editor

This Special Issue on “Engineering Metamaterials” focuses on the theory and applications of electromagnetic metamaterials, metasurfaces, and metamaterial transmission lines as the building blocks of present-day and future electronic, photonic, and microwave devices.

Submissions are invited on topics including, but not limited to:

- Active, smart, and controllable metamaterials,
- Metamaterials for green energy,
- Metamaterials for radiative heat transfer,
- Metamaterials for biomedical applications,
- Fractal and topological metamaterials,
- Metamaterials for absorbers and energy harvesters,
- Metamaterial antennas and sensors,
- Metamaterials for wave front and polarization control,
- Metamaterial waveguides and transmission lines,
- Metamaterial-inspired filters, phase shifters and delay lines.

Welcome to contribute!
