Deadline for manuscript submissions: **31 October 2019**

**Message from the Guest Editor**

This Special Issue on “Engineering Metamaterials” focuses on the theory and applications of electromagnetic metamaterials, metasurfaces, and metamaterial transmission lines as the building blocks of present-day and future electronic, photonic, and microwave devices.

Submissions are invited on topics including, but not limited to:

- Active, smart, and controllable metamaterials,
- Metamaterials for green energy,
- Metamaterials for radiative heat transfer,
- Metamaterials for biomedical applications,
- Fractal and topological metamaterials,
- Metamaterials for absorbers and energy harvesters,
- Metamaterial antennas and sensors,
- Metamaterials for wave front and polarization control,
- Metamaterial waveguides and transmission lines,
- Metamaterial-inspired filters, phase shifters and delay lines.

Welcome to contribute!
