submissions:

closed (30 May 2015)

Message from the Guest Editors

Dear Colleagues,

This Special Issue covers both organic and inorganic materials and devices for flexible electronics. Papers in the areas of materials synthesis, characterization, and modeling, along with device fabrication and testing, are requested. Areas of interest include organic and inorganic semiconductors (n-type or p-type), memory devices, sensors, and functional devices. Papers demonstrating novel applications, including display, large-area sensors, functional devices, RFID tags, smart medical sensors, fabric, and paper-based devices will be considered. Novel, large area processing methods, such as ink-jet processing, spray pyrolysis, solution deposition, and roll-to-roll processing, are also of interest.

Dr. Manuel Quevedo

Dr. Harish Subbaraman

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
