

Intelligent Surveillance and Smart Home

Guest Editors:

Prof. Dr. Eric Campo

LAAS-CNRS, 31400 Toulouse,
France

eric.campo@univ-tlse2.fr

Prof. Dr. Norbert Noury

Department of Biomedical
Engineering, University Claude
Bernard Lyon 1, 69100
Villeurbanne, France

norbert.noury@univ-lyon1.fr

Prof. Dr. Mounir Mokhtari

Institut Mines–Telecom, 91120
Palaiseau, France

mounir.mokhtari@imt.fr

Deadline for manuscript
submissions:

28 February 2022

Message from the Guest Editors

While this Special Issue invites topics broadly across the tools, methodology, infrastructure, devices, and use cases in real conditions, the topics of interest include but are not limited to:

- Wearable electronic device design for health monitoring;
- People's daily activities data learning;
- Human activity recognition;
- Assisted living solutions, assistive technologies;
- Living labs for health and autonomy;
- Self-configurable networks for smart homes;
- Smart homes/home networks/residential gateways;
- Adaptive interaction for home control by users;
- Processing and data fusion algorithms based on artificial intelligence;
- Smart dust and buried sensors for home environments;
- Smart control for energy management;
- Heterogeneous data learning;
- Internet of Things for smart environments and e-Health;
- Middleware support for smart home and health telematic services;
- Context awareness/autonomous computing;
- Human-machine interface/ambient intelligence;
- Epidemic disease prediction systems;
- Human factors in autonomous smart systems.
