Message from the Guest Editor

Ever since they first emerged as a spinoff from integrated circuit technology, MEMS/NEMS devices have experienced progress that has not only been remarkable but is still rapidly progressing.

Worldwide, excellent research activities on MEMS/NEMS devices are steadily contributing to the progress of the state-of-the-art, and in this Special Issue, we will highlight work of excellence in the field.

Potential topics include, but are not limited to, the keywords listed below:

- MEMS devices
- NEMS devices
- micro- and nanosystems
- Microsensors
- Microactuators
- Silicon micromachining
- Bulk micromachining
- Surface micromachining
- Front-end electronics
- Monolithic integration

Welcome to contribute!

an Open Access Journal by MDPI

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
