Deadline for manuscript submissions:  
**31 May 2021**

### Message from the Guest Editor

Open source software features like customization, reduced adoption cost, interoperability, continuous improvement cycle, peer-review development methodology, and community support make it especially interesting for educational processes. This Special Issue focuses on educational experiences where free/libre/open source software provides a key value. We invite investigators to contribute original research articles as well as review works on any educational level or context.

Topics of interest include, but are not limited to:

- Open source software in education;
- Technology-enhanced learning based on open systems;
- Best practices of open collaboration for online education;
- Challenges for the adoption of open source solutions in educational contexts;
- Smart open source environments and educational trends;
- Open source methodologies and ICT education;
- Case studies of education based on open communities;
- Open source and inclusive learning;
- The role of open technologies in educational digital divide.
