Message from the Guest Editors

Dear Colleagues,

Various aspects of the security of wireless communications are extremely important for the successful operation and widespread adoption of modern information technologies. Wireless communications have special requirements and vulnerabilities, and therefore are of special concern. In particular, wireless networks are vulnerable to malicious attacks and the number of potential threats has been increasing dramatically. Recently, considerable novel challenges have emerged in view of the rapid growth of advanced applications of wireless communications in commercial and industrial domains embracing Wireless Sensor Networks and the Internet of Things. In order to overcome these challenges, it is vitally important to develop a range of novel approaches as well as sophisticated combinations of useful and efficient security techniques. Relevant security measures include data encryption and device and user authentication. Privacy-preserving data mining is also essential for secure analysis of the big data pertaining to wireless communications.

an Open Access Journal by MDPI

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
