

The Technologies That Disappear: 30 Years after Mark Weiser's Vision

Guest Editors:

Dr. Michele Girolami

ISTI-CNR, Institute of Information
Science and Technologies, 56124
Pisa, Italy

Dr. Davide La Rosa

ISTI-CNR, National Council of
Research, Pisa, Italy

Deadline for manuscript
submissions:
closed (31 December 2021)

Message from the Guest Editors

With this Special Issue, we aim to collect novel contributions from researchers and industry players in the field of the Ambient Intelligence with the goal of describing how electronic components have been adopted to design applications targeted at end-users. In particular, we look for hardware and software designs providing new services for users, in order to improve their life quality at home or, more generally, in places where users live and interact with others. Our focus is also on the use of commercial-wearable electronics that can be used for such applications, by providing evidence of a concrete implementation of the ubiquitous computing paradigm proposed the last decade of 90' years.

Keywords:

- Ambient Intelligence (AmI) services
- IoT technologies for AmI services
- Wearable and portable electronics
- Consumer electronics and hardware design
- Ultra-low power machine learning at the edge
- Pilot sites and real-world deployment of AmI services
- Testbeds, applications, case studies
- Hardware and software architecture for edge computing and crowdsensing
- Tools for data fusion and analytics and their adoption
- Artificial Intelligence methods
- Cyberphysical systems

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), [Inspec](#), [Ei Compendex](#) and [other databases](#).

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
