

Applications and Trends in Social Robotics

Guest Editors:

Dr. María Malfaz

Dr. José Carlos Castillo

Dr. Álvaro Castro Gonzalez

Dr. Fernando Alonso

Deadline for manuscript
submissions:

closed (10 November 2021)

Message from the Guest Editors

Social robots are intended to coexist with humans and engage in relationships that lead them to a better quality of life. The success of these relationships relies on a positive perception of the robots that can be achieved by their behavior through AI, computational models, or robot embodiments. This Special Issue aims to foster the development of innovative ideas, novel applications and relevant studies that contribute to the integration of social robots in our daily society.

The Special Issue welcomes original contributions describing technically rigorous scientific and philosophical advances in the area of social robotics and AI: innovative ideas and concepts, new discoveries and improvements, and novel applications on advances in the social robotics technologies.

In addition, a series of workshops associated to “The Eleventh International Conference on Social Robotics” will be held in Madrid, Spain, on 26-29 November 2019. The authors of the papers that will be presented at these workshops about related topics are invited to submit their extended versions to this Special Issue after the conference.

Welcome to contribute.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
